

Creating landmarks. Inspiring pride.

PIONEER HALL

A photograph of a brick building facade with large windows, overlaid with a semi-transparent green filter.

**We are creators. An important catalyst, constructor and community member, committed to reducing risk, building confidence and deliberately planning for our partners' success — from vision through construction and beyond.**

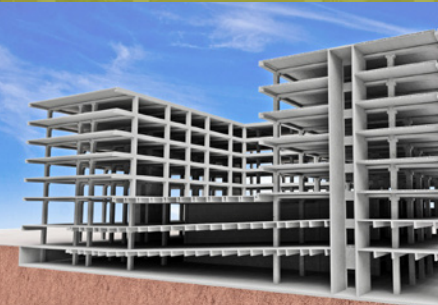

## Collaborative approach to creation.

From the design through operation, we work collaboratively to:

- Deliver visionary solutions — on time and on budget
- Promote timely, open, and transparent communication
- Anticipate, understand, and deliver on our partners' needs
- Maintain safe work environments for our people and partners
- Reach our collective goals and take pride in what we achieve together

Every project is an opportunity to create long-term community impact through transformational ideas, plans and processes that exceed our partners' expectations and turn their vision into a reality.

By raising the standards within our industry and helping develop local landmarks, we inspire greater pride throughout communities and help individuals thrive where they live and work.

# Inventive solutions at every stage.

## Design

To bring our partners' visions to life, Wells offers comprehensive preconstruction services, leveraging value engineering and inventive solutions for complex building challenges throughout the planning process.

Defining the project scope, schedule, cost and design opportunities as early as possible creates greater efficiency, reduces risk throughout construction and helps achieve an optimal result.

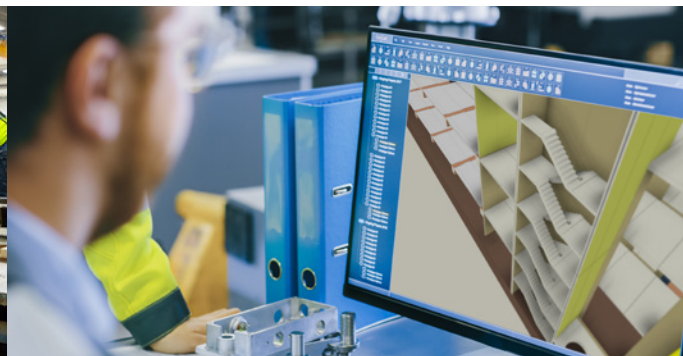

## Build

Working closely with our partners, Wells' team of problem solvers is dedicated to delivering visionary solutions for each new project. Our commitment to innovation and communication allows us to build stronger bonds, stronger communities, and find stronger designed and engineered solutions to meet evolving market challenges.

Whether you're planning new construction or a building expansion, Wells' solutions lead the industry in quality, building design and construction efficiency. Our full range of structural, architectural and total precast solutions make projects a true work of art while ensuring their completion on time and on budget.

## Maintain

From the outset, we work to ensure every design enhances a project's value and minimizes long-term maintenance and operating costs; but we can also help you plan ahead to protect your investment's vitality with customized maintenance, restoration and repair services.

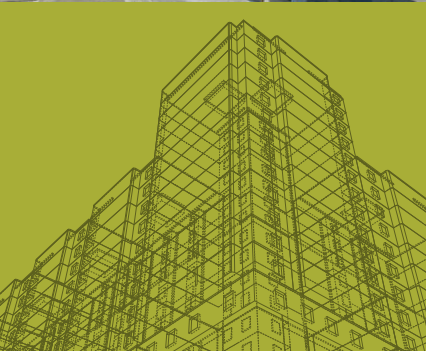

## Driven to help communities thrive.

At the heart of all our efforts are the individuals who will work, learn, live in and enjoy the landmarks we create. Wells' breadth of experience allows us to successfully serve virtually every project need; from residential living and healthcare facilities, to manufacturing and food processing, to municipal landmarks and commercial, retail, and entertainment destinations.

Helping your project succeed contributes to higher standards in our industry — and a higher quality of life for those who make up the communities in which we build.

## Safe practices to ensure your success.

Safety is the foundation of our industry. By creating and maintaining safe environments, we effectively reduce downtime and project inefficiency. This allows our partners and employees to enjoy greater peace of mind, focus on doing their best work and share in the resulting success.

- Industry-leading safety culture
- Strategic and measurable safety leadership programs
- Educating and empowering employees to protect and support each other
- Ensuring all environmental, governmental agency requirements are exceeded

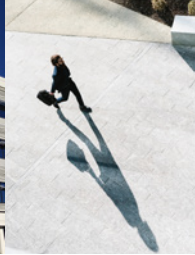

## Laying the groundwork for stronger relationships.

For more than 70 years, Wells has continually pursued innovative techniques and transformational building processes. It's how we've evolved to become industry leaders and expanded our footprint to help transform communities across the United States.

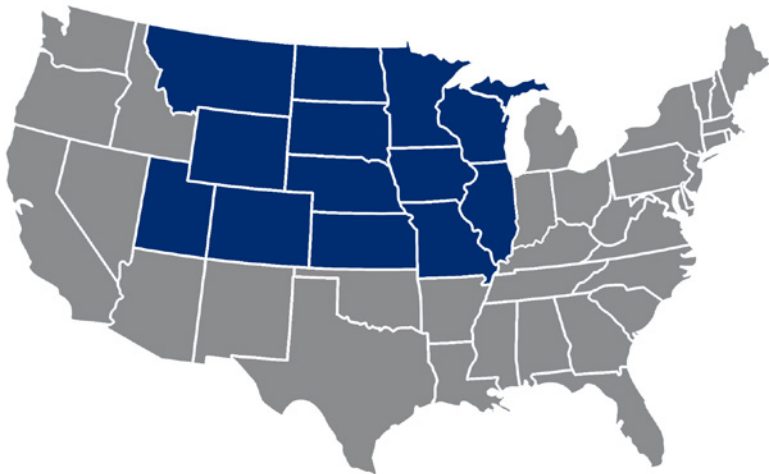

We remain deeply committed to the communities in which we work and build — and view each new project as a new opportunity to create lasting, meaningful relationships. Through event participation, volunteerism and educational support at more than 10 college campuses, our team is committed to community stewardship, supporting non-profits, local businesses and trade associations that help individuals and communities continue to innovate and flourish, well into the future.

Let's transform your community.
