

# Architectural Inspiration Guide

# Inspiring designs. Transforming communities.

Every project concept begins with a unique vision. As the design evolves, Wells has the versatile building solutions needed to achieve your desired aesthetic.

Wells' wide array of architectural finishes, custom designs and special features provide limitless combinations that reflect your style — and establish your project's value to the community. This guide is only the beginning. With your imagination, there are no limits to what we can create together.

## Experts in every facet of construction.

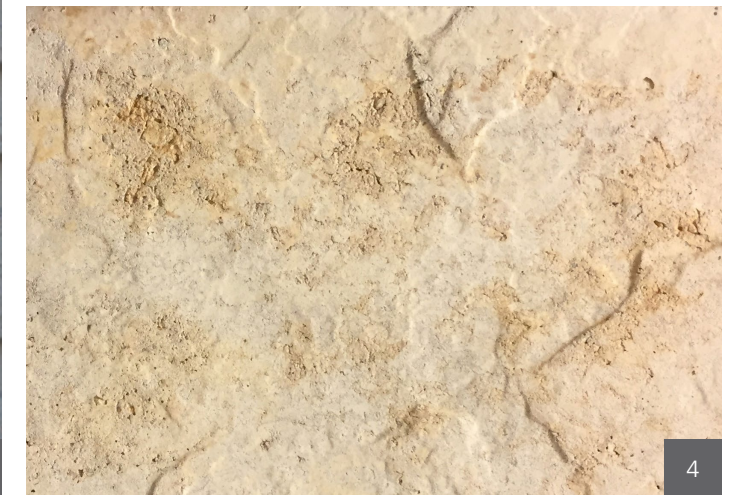

As one of the nation's leading prefabricated building solutions providers, Wells offers an unparalleled experience as your creative collaborator. No matter where your project is located, where you are in the design process or what effect you want to create, you can rely on Wells to deliver innovative solutions that enhance your ideas.

Wells is certified in all PCI Architectural Precast categories, including the most technical AA certification, which meets stringent requirements for dimensional tolerances, finish variations and color consistency for iconic, high-performing structures. When working with Wells, you'll always receive high-quality building solutions to create beautiful, long-lasting buildings in any community.

# Let your imagination run free.

Put the finishing touch on your project. As your creative partner, Wells experts guide you through our wide variety of colors, textures, unique features and custom exterior design options to bring your architectural vision to life.

## Create a unique look and feel with our finish options.

Finishing techniques used on wall panels and other prefabricated materials can create a wide variety of surface textures and different visual effects — from smooth, polished pieces to a more natural look.

Available in virtually any color or combination you desire, Wells' expansive finish options are designed to help you achieve a unique and exceptional final result for any project.

### **Burnished**

Delicate polishing process to achieve minimal aggregate exposure that creates a metallic effect [1].

### **Polished**

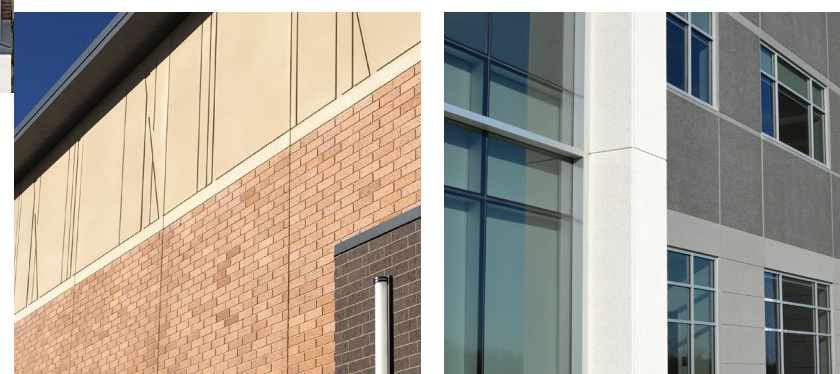

Results in a smooth, exposed aggregate [2].

### **Terazzo**

A deep polish technique that introduces aggregates into the concrete mix to create a terazzo-like finish [3].

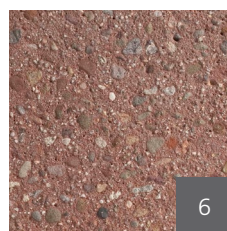

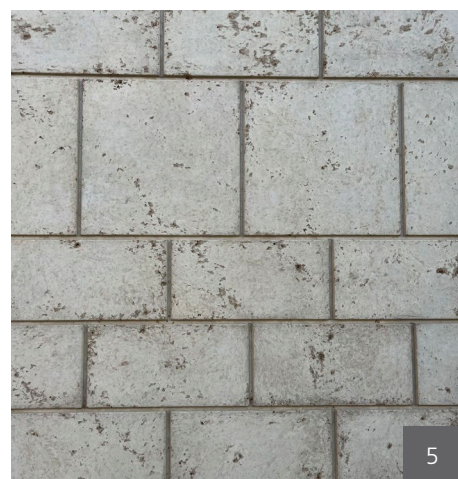

### **Oldstone**

Achieve the look of natural stone and match classical architectural styles — with less maintenance [4].

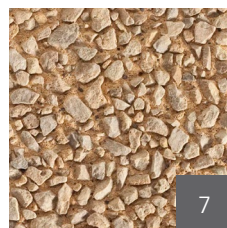

**Travertine**

Creates a natural, textured look [5].

**Sandblast**

Provides an exposed, textured finish [6].

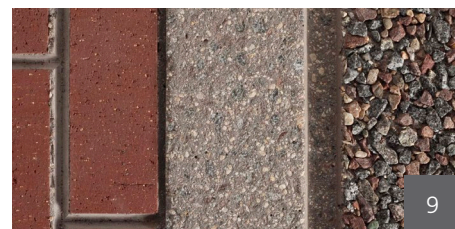

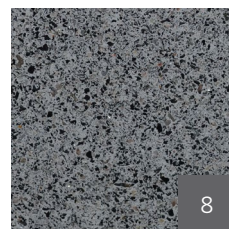

**Waterwash or Exposed Aggregate**

Adds visual interest and preserves the aggregate's dynamic, rocklike texture [7].

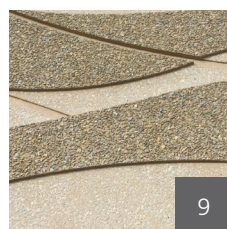

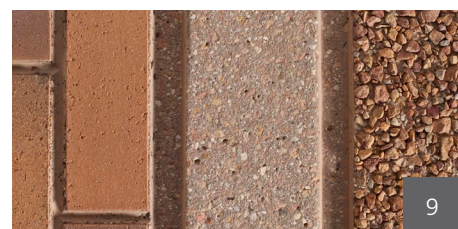

**Acid Etch**

Leaves a sparkle or "sugar-cube" effect and a refined finish appearance [8].

**Combination Finishes**

Using the concrete finish to help tell a story, combination finishes offer countless opportunities to mix different techniques to create visually interesting dynamic facades [9].

## Transform the appearance with custom designs.

For an even more distinct look and visual appeal, Wells offers a wide variety of custom design capabilities. Our innovative materials and processes ensure limitless possibilities for your design.

- Formliners
- Imprinted Designs
- Tile
- Thin Brick
- Acrylic Veneers
- Terra Cotta
- Stone Veneers and Matching Finishes
- Stains and Paint

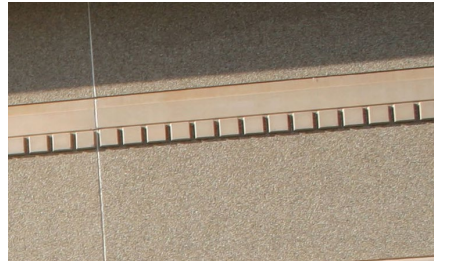

## Available in a full spectrum of customizable color.

Through a variety of aggregates, mixes and pigmentation, Wells offers virtually unlimited color options to achieve your desired aesthetic.

## Enhance your design with dynamic special features.

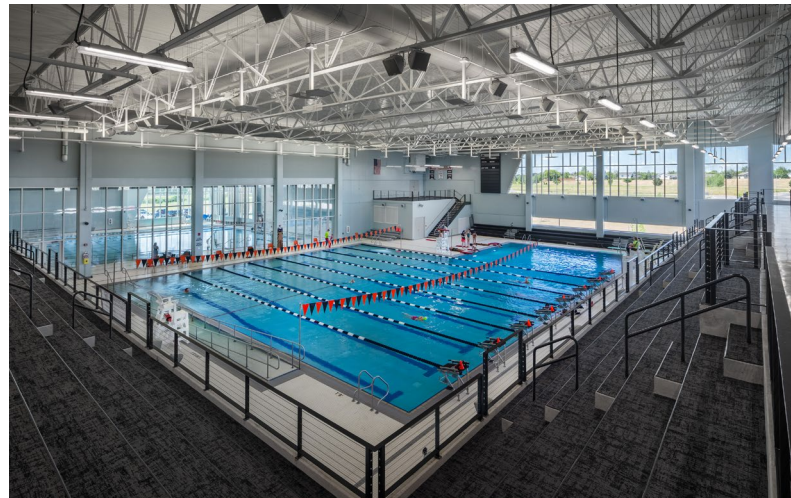

With the ability to meet aesthetics from the most traditional to the most modern architectural styles, special features can be incorporated into your project to create a distinct appearance with greater dimension and variety of surface depth.

- Bullnoses
- Reveals
- Formliners
- Cornices
- Dentils

## Achieve your aesthetic with interior wall finish options.

Prefabricated concrete is a versatile building solution, supporting design requirements with finish solutions from the exterior to the interior of the building. For wall panels that double as the interior finish, Wells provides a variety of finish options to meet your specific project needs.

From exposed concrete supporting modern office designs to sealed, USDA-compliant interior finishes, we have the options for your project needs.

### Interested in a particular design?

Wells can create samples customized to your project needs. Connect with our architectural solutions sales experts at [wellsconcrete.com/leadership](https://wellsconcrete.com/leadership).

## Set the foundation for architectural innovation.

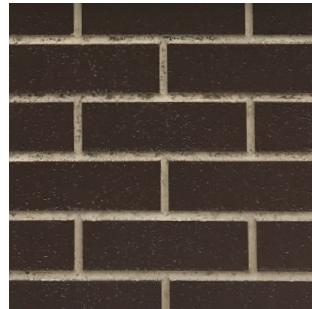

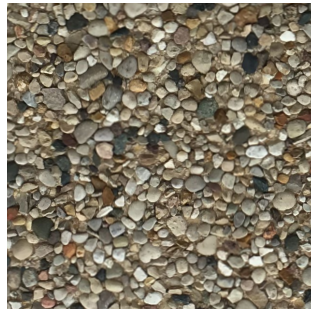

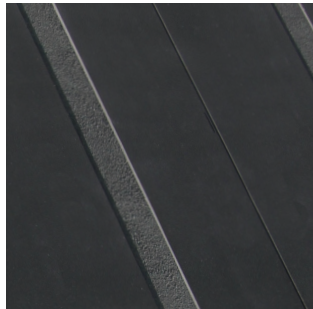

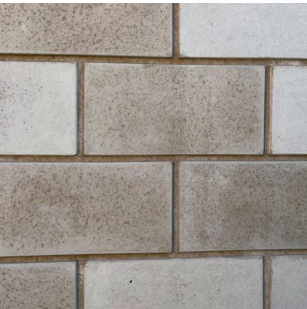

Pursuing innovation transforms the landscape of our industry. As your partner, we aim to expand your thinking and help you explore new possibilities — and welcome any design challenge, no matter how complex.

We invite you to bring your most unexpected ideas to our building solutions experts. No matter what you envision — or where your project is located — together, we can begin creating landmarks that inspire pride.

# Ready to create something remarkable?

Bring your  
inspiring ideas  
to our building  
solutions experts.
